Davi Rezende, Software Engineer

I have more than 4 years of experience with programming, my strong point is the front-end and the creativity to solve problems, my focus nowadays is the ReactJS library and its main frameworks, Next.js for example, I already led my team of front-end developers in the development of a complete checklist application for heavy equipment and a web system with several modules such as finance, sales, maintenance, production, etc. All these projects with modern and performative interfaces with different functionalities, using the newest and most complete in the programming market, applying practices such as clean code, design patterns, etc.
